PREFAȚĂ

Volumul al II-lea al seriei de publicațiuni privitoare la rezultatele recensământului general al populației din 1930 cuprinde statistica detaliată pe neamul, limba maternă și religia populației, pentru fiecare localitate în parte.

Aceste elemente au ajuns la o importanță deosebită în anii din urmă, prin faptul că în unele țări au servit drept pivot de orientare politică.

Guvernul dela epoca recensământului — reprezentat prin titularul departamentului Muncii, Sănătății și Ocrotirilor Sociale, *Prof. I. Răducanu* și pe urmă prin *Prof. E. Hațieganu* și prin d-l subsecretar de Stat *Prof. Iuliu Moldovan*, care a luat inițiativa executării primului recensământ general al României întregite și s'a ocupat direct de organizarea lui, — precum și Comisiunea de recensământ prezidată de d-l *Prof. Dimitrie Gusti* care a dat tot timpul îndrumarea științifică lucrării, au fost de acord asupra faptului că pârghia recensământului din 1930 trebue să fie stabilirea cât mai exactă a repartizării populației României pe grupuri etnice.

Trebue de asemenea amintit că, nu mult înainte, în Aprilie 1927, la inițiativa ministrului internelor *Oct. Goga*, și prin munca stăruitoare a d-lui *N. T. Ionescu*, directorul Statisticii Demografice de atunci, s'a executat o « numărătoare » a populației țării prin organele administrative dependente de Ministerul Internelor, în care apare, pentru prima oară, întrebarea privind « originea etnică » a populației. Datele acestei numărători au fost supuse, conform legii, aprobării Consiliului Superior de Statistică, care n'a acordat aprobarea solicitată pentru publicarea lor. Rezultatele acestei numărători nu au fost deci acceptate de către organul tehnic al Statului.

Ținând socoteală de această experiență, s'au căutat alte criterii prin care să se poată obține date statistice necontestabile. Statul trebuia să cunoască neapărat, odată cu recensământul din 1930 — care rămâne primul recensământ general de populație al României întregite — structura etnică a populației, mai ales că în lipsa datelor oficiale românești, continuau să circule datele recensămintelor dinainte de război și anume:

1. Pentru Vechiul Regat datele recensământului din 1912;

2. Pentru Dobrogea-Nouă datele recensământului din 1910;

3. Pentru Transilvania, Banat, Crișana și Maramureș datele recensământului din 1910;

4. Pentru Bucovina datele recensământului din 1910;

5. Pentru Basarabia datele recensământului din 1897.

Aceste date nu mai puteau fi folosite, nu numai pentrucă erau prea vechi și anterioare marelui război, care a produs schimbări importante în structura populației țării, ci și pentru faptul că recensămintele antebelice au fost făcute de către cinci țări deosebite, cu regimuri politice deosebite și cu organizări statistice cu totul diferite. Aceste țări au fost: 1. România, 2. Bulgaria, 3. Ungaria, 4. Austria și 5. Rusia. In plus, pentru Vechiul Regat în 1912, nici nu s'a pus problema structurii etnice a populației. Această problemă s'a pus în discuție pentru Vechiul Regat pentru prima oară, în afară de încercarea dela 1927, cu ocaziunea Recensământului general al populației din 1930.

Idealul urmărit la recensământul din 1930 a fost obținerea de date cât mai precise. A trebuit însă să se țină seamă de faptul că, în domeniul statisticii etnice, *nu există criterii sigure de apreciere*.

In afară de aceasta, chiar dacă asemenea criterii ar exista, cercetarea și dovedirea originii etnice pentru toți locuitorii țării ar implica o procedură complicată și de lungă durată. Ea nu ar putea fi aplicată cu succes la un recensământ general de populație care — spre a preîntâmpina alterarea exactității numărătorii prin deplasările de populație inerente — trebue executat într'o singură zi, pe întreg teritoriul țării.

Trebuia să se aleagă între postulatul unei constatări *obiective*, care pe bază documentară să stabilească apartenența etnică a fiecărui individ și între declarația *subiectivă* a fiecărui cetățean (pentru minori a părinților) care nu ne arată întotdeauna originea etnică, dar care indică faptul

asimilării unui individ de către un anumit grup etnic, şi măsoară intensitatea acestui fenomen în ansamblul populaţiei ţării.

Definiţia subiectivă are marele desavantaj al impreciziunii antropo-biologice. Utilizarea ei nu este justificată decât atunci când ştiinţa nu poate oferi criterii obiective de diferenţiere rasială. Ori, tocmai acesta este cazul. Am fost nevoiţi să ne limităm la cunoaşterea *sentimentului individual de apartenenţă etnică* al fiecărui cetăţean, sentiment care nu este întotdeauna imuabil, dar care are totuşi avantajul de a demonstra mărimea fiecărui grup etnic din ţară, după felul cum cetăţenii se consideră ei singuri legaţi de un grup sau altul.

Odată acest principiu acceptat, trebuia să se găsească o definiţie precisă şi simplă a apartenenţei etnice subiective şi să se ia cele mai severe măsuri, pentru ca înregistrarea să se facă liber şi după conştiinţa fiecărui cetăţean. Definiţia adoptată a fost aceasta: se va înscrie *neamul de care cineva se simte legat prin tradiţie şi sentimente.*

S'a subliniat că declaraţia se acceptă întocmai şi că recenzorul nu are dreptul de a modifica sau a face investigaţiuni pentru verificarea ei. Această dispoziţie a fost firească, îndată ce Comisiunea de recensământ a hotărît utilizarea metodei subiective de constatare a apartenenţei etnice. Totuşi, instrucţiunile au precizat că toţi cetăţenii trebue să facă declaraţii plauzibile, adică să nu se declare ca aparţinând unor neamuri cari nu există în România sau unor rase de culoare.

Şi trebue să constatăm că acest principiu a fost respectat în întreaga ţară, cu excepţia unei singure localităţi, unde, pentru un număr disparent de cazuri, delegatul Direcţiunii Recensământului, din propria lui iniţiativă şi contrar instrucţiunilor primite, prin exces de zel a socotit ca neverosimile unele declaraţiuni care trebuiau să fie acceptate fără cercetare. Aceste verificări, mărginite pentru întreaga ţară la câteva zeci de cazuri dintr'o singură localitate, nu ar fi putut influenţa în niciun fel rezultatele, nici chiar în acea localitate. (Este vorba de Evreii de religie mozaică cari s'au declarat de neam maghiar. In Transilvania acest fenomen s'a petrecut pe scară întinsă şi în publicaţiunile noastre datele apar conform declaraţiunilor făcute).

Acceptarea criteriului subiectiv pentru determinarea grupelor etnice a impus abandonarea definiţiei de « origină etnică » şi adoptarea termenului de « neam ».

Odată acest lucru stabilit de către Comisiunea de Recensământ şi aprobat de Guvern, trebuiau luate măsurile cuvenite, pentru ca înregistrarea şi prelucrarea datelor să fie făcute după criteriile tehnicii statisticii ştiinţifice, spre a se garanta *exactitatea declaraţiunilor.* Aceste măsuri au fost luate de Direcţia Recensământului General al Populaţiei din 1930.

Comisiunea de Recensământ trebuia neapărat să-şi câştige convingerea că în România, fiecare cetăţean *ştie* cărui grup etnic aparţine. S'a invocat un argument decisiv: este cert faptul că generaţia care a participat la războiul mondial, — şi care a fost martoră la toate schimbările politice provocate de acesta — nu a rămas pasivă din punctul de vedere al conştiinţei naţionale. Fiecare individ a luptat într'o tabără sau alta, cu convingere sau fără convingere, dar conştient de faptul că locul lui este acolo, sau în tabăra adversă. Formarea legiunilor de voluntari, supravegherea pe fronturi a tuturor soldaţilor minoritari, grupările militare formate în timpul revoluţiei din 1917 şi 1918, — toate acestea au dovedit că, cel puţin în ceea ce priveşte conştiinţa, fiecare individ a fost lămurit asupra cărui grup etnic îşi revarsă simpatia şi cu care grup anume se simte solidar din punct de vedere naţional, prin simţămintele sale.

Acesta a fost argumentul principal al Comisiunii de Recensământ, atunci când s'a discutat problema statisticii etnice propriu zise.

Trebue însă să precizăm că în acest domeniu nu există, în nici o ţară din lume, criterii obiective de judecată, care să permită întocmirea unei statistici etnice mai precise. Şi nu numai atât. Nici o ţară nu a utilizat o metodă directă de numărare a cetăţenilor pe grupuri etnice. Aproape toate ţările din lume au renunţat la această metodă, pe care conform uzanţei internaţionale, ar fi trebuit s'o omitem şi noi cu desăvârşire. Pentrucă la data când s'a executat recensământul din 1930, aproape pretutindeni s'a utilizat o metodă indirectă, identificându-se apartenenţa etnică cu *limba maternă* [1]). Este adevărat totuşi că ţările coloniale, sau cele cari au populaţie de negri, fac deosebiri între albi şi negri, albi şi aborigeni, neamul cercetându-se numai pentru imigranţi şi confundându-se uneori cu ţara de origină a acestora.

---

[1]) Astfel, structura etnică a populaţiei s'a stabilit după *limba maternă* (uneori limba vorbită obişnuit) în Germania, Polonia, Ungaria, Cehoslovacia; aceasta din urmă renunţând la « naţionalitatea etnică » folosită la recensământul din 1921 şi adoptând în 1930 tot limba maternă.

Fenomenul contrariu s'a întâmplat în U.R.S.S. care a scos întrebarea « limba maternă » existentă în 1920, spre a păstra numai pe cea privitoare la naţionalitate; iar în Estonia fiecare cetăţean este liber să-şi determine singur naţionalitatea.

Menţionăm de asemenea că la a XX-a seziune a Institutului Internaţional de Statistică, în şedinţa din 16 Septemvrie 1931, la propunerea reprezentantului Ungariei, s'a pus la ordinea de zi problema stabilirii apartenenţei etnice pe baza limbii materne (limbii vorbite mai des şi de preferinţă). După ample discuţii, subliniindu-se dificultăţile teoretice şi practice pe care le ridică stabilirea unor criterii obiective pentru determinarea naţionalităţii etnice, discuţiunea a fost amânată fără să se fi ajuns la nici o concluziune.

Criteriile noastre de definire a grupurilor etnice au fost cele mai complete din câte se cunosc astăzi în literatura internațională. Aceste criterii au fost: 1. neamul declarat; 2. limba maternă pe care a învățat-o dela părinți și pe care o vorbește de preferință; 3. religia — care în România constitue o stare obiectivă legală și care este un criteriu tot atât de important în identificarea etnică (în mod absolut pentru unele neamuri, relativ pentru altele și totdeauna foarte prețios atunci când se găsește asociată cu celelalte elemente de informație) ca și limba maternă și în fine 4. cetățenia.

In volumul al II-lea, partea 1-a, se publică pentru fiecare localitate datele privitoare la neam și la limba maternă, în cadrele aceleeași tabele, astfel ca datele să poată fi comparate cu ușurință. Am făcut tot ce omenește ne-a stat în putință, spre a asigura o înregistrare cât mai completă și cât mai sinceră, grupând apoi în publicațiuni rezultatele, în așa fel ca ele să fie comparabile și controlabile.

Socotesc că acest fel de prezentare constitue nu numai o procedură eminamente științifică, dar și patriotică. Față de acest procedeu, a contesta o cifră totală ar constitui un nonsens. Ar trebui să se probeze inexactitatea cifrelor parțiale. In acest caz însă, *Institutul Central de Statistică* are în arhiva sa documentară buletinele familiale de înscriere, cu toate detaliile și certificările necesare, întocmite pe străzi, clădiri și gospodării stabile și nu pe persoane sau familii volante, astfel încât poate face oricând o contradovadă de fapt, excluzând orice putință de controversă.

Am pus față în față, pe două pagini, datele privitoare la neam și limbă maternă, pentrucă acestea sunt cele mai ușor de comparat. Tehnica tipografică nu a permis să publicăm tot pe aceleași pagini religia și cetățenia; aceasta din urmă se va publica pe unități administrative mai mari în volumul IV al publicațiunilor Recensământului general din 1930. Totuși, socotesc că acest procedeu va da satisfacție deplină și va permite atât cercetătorilor cât și criticilor o aprofundare serioasă a problemei etnice în România.

Din cele expuse mai sus, rezultă că numărul neamurilor recunoscute în România nu a fost limitat de organele recensământului. S'au acceptat toate înscrierile, așa cum ele au fost făcute de cetățeni. Deci nu există o listă a neamurilor admise la înscriere. Direcțiunea Recensământului General al Populației din 1930 nu a silit pe nimeni să se declare că aparține la un neam sau altul. Direcțiunea Recensământului a fost chiar obligată să supravegheze ca declarațiile să nu fie influențate de nici o propagandă de nici un fel.

La prelucrarea materialului însă, însăși tehnica lucrărilor a impus întocmirea unei liste a neamurilor cari au fost *mai frecvent declarate.* Acelaș lucru s'a făcut pentru limba maternă și pentru religie.

Listele stabilite pentru prelucrarea statistică a celor trei probleme, adică, neam, limbă maternă și religie, publicate în volumul de față, sunt următoarele:

NEAMURI

Român
Ungur (maghiar, săcui)
German (sas, șvab, neamț, țipțer)
Rus (muscal)
Bulgar
Evreu (israelit)
Sârb
Rutean, ucrainian, malorus, rusneac
Grec
Țigan
Huțan, huțul
Armean
Lipovan
Polon
Ceh
Slovac
Găgăuz
Tătar
Albanez (arnăut)
Turc
Alte neamuri [1])
Necunoscut

LIMBI MATERNE

Română
Ungară (maghiară)
Germană
Rusă
Bulgară
Ruteană și ucrainiană
Sârbă (croată, slavonă, slovenă)
Turcă-tătară
Țigănească
Cehă și slovacă
Polonă
Greacă
Armeană
Albaneză
Idiș
Spaniolă-portugheză (inclusiv dialectul evreesc-spaniol)
Alte limbi [1])
Necunoscută

[1]) Cuprinde toate celelalte neamuri și limbi materne cari nu figurează în această listă și cari au fost declarate la recensământ.

RELIGII

Creştin-ortodox (român, greco-oriental, creştin, ortodox-român, greco-ortodox, pravoslavnic)
Greco-catolic (român, greco-catolic unit, creştin unit)
Catolic, rit latin (romano-catolic)
Reformat (calvin)
Evanghelic-luteran (protestant, inclusiv anglican şi presbiterian)
Unitarian
Armean-gregorian
Mozaic (mozaic de rit occidental, de rit spaniol, mozaic-ortodox, israelit, evreesc)
Mahomedan (musulman)
Greco-catolic-rutean (rutean-unit)
Armean-catolic
Lipovan cu popă şi fără popă (Bezpopov)
Adventist
Baptist
Alte religii şi secte[1])
Fără religie şi liber-cugetători
Necunoscut

In ceea ce priveşte religiile, Comisiunea de Recensământ s'a condus după legea cultelor.

La publicarea rezultatelor a trebuit să se ţină seamă şi de necesităţile tipografice. Aceasta a făcut ca tabelele noastre să cuprindă următoarele elemente:

Neamul: Români, Unguri, Germani, Ruşi, Ruteni-Ucrainieni, Sârbi-Croaţi-Sloveni, Bulgari, Cehi-Slovaci, Poloni, Huţani, Evrei, Greci, Albanezi, Armeni, Turci-Tătari, Găgăuzi, Ţigani, Alte neamuri, Nedeclaraţi.

Limba maternă: Română, Ungară, Germană, Rusă, Ruteană-Ucrainiană, Sârbă-Croată-Slovenă, Bulgară, Cehă-Slovacă, Polonă, Idiş, Greacă, Albaneză, Armeană, Turcă-Tătară, Ţigănească, Alte limbi, Nedeclarată.

Religia: Ortodocşi, Greco-catolici, Romano-catolici, Reformaţi (calvini), Evanghelici (luterani), Unitarieni, Armeno-catolici, Lipoveni, Adventişti, Baptişti, Mozaici, Mahomedani, Alte religii şi secte, Fără religie, Liber cugetători, Religie nedeclarată.

După cum am arătat, neamul a fost acceptat aşa cum a fost declarat de locuitori. Dacă ar fi existat însă declaraţiuni masive de neamuri înrudite dar neidentice, am fi făcut o nouă diviziune din aceste neamuri, chiar dacă această nouă diviziune ar fi produs complicaţii de ordin tehnic, care ar fi întârziat şi mai mult terminarea lucrărilor [1]). S'a constatat însă că Românii s'au declarat ca atare chiar şi acolo unde ei îşi spun: Moldoveni, Moţi, Mocani, etc. Germanii s'au declarat ca atare chiar dacă în conştiinţa publică şi în istorie ei apar ca saşi, şvabi, etc., şi vorbesc nemţeşte, săseşte, şvăbeşte, etc. Ungurii s'au declarat ca atare în toate provinciile chiar dacă sunt cunoscuţi sub denumirea de maghiari, săcui sau ciangăi (o limbă săcuească sau ciangăiască nu se cunoaşte). In fine, au fost înregistraţi conform declaraţiilor lor, rutenii, ucrainienii şi separat ruşii. Insăşi declaraţiile acestora au impus despărţirea în ruşi şi ruteni-ucrainieni.

Direcţiunea Recensământului General al Populaţiei din 1930 nu putea decât să aplice principiul stabilit de Comisiunea de Recensământ şi să nu intre în controverse de ordin etnic, a căror rezolvare îi depăşeşte atribuţiunile legale, principiu pe care l-a păzit cu sfinţenie.

Nu vom face analiza datelor cuprinse în acest volum. S'a luat hotărîrea ca volumele individuale să cuprindă numai datele analitice, tabele cu caracter general şi o scurtă expunere asupra tehnicii de lucru. Analizele de date se vor face într'un volum special, care va încheia seria publicaţiunilor şi care va cuprinde şi date comparative.

Ne limităm deci să publicăm cartogramele etnografice şi linguistice, precum şi pe cele ale distribuţiei populaţiei pe religii, odată cu tabelele generale recapitulative.

Vom arăta în tabelele ce urmează distribuţia generală a populaţiei României după neam, limbă maternă şi religie.

[1]) Cuprinde toate celelalte religii cari nu figurează în această listă şi cari au fost declarate la recensământ.

[1]) Rezultatele recensământului general al populaţiei din 1930 apar cu o întârziere considerabilă, pentru *unicul motiv* al lipsei de fonduri. Trebue reţinut faptul că întreaga lucrare a fost prelucrată cu un număr redus de personal detaşat dela alte autorităţi şi cu un număr ceva mai ridicat de diurnişti. Deci, la începerea lucrărilor, personalul cu experienţă prealabilă a lipsit aproape cu desăvârşire.

La această dificultate se adaugă şi faptul că prelucrarea s'a făcut cu metodă mecanică, introdusă pentru prima oară în România.

Cu toate aceste dificultăţi, Institutul ar fi putut începe publicarea rezultatelor, încă din anul 1934, dacă ar fi existat fonduri pentru publicaţiuni. Primul fond înscris în acest scop în buget apare în 1937/1938. Din nenorocire, lucrările prealabile şi supraîncărcarea Imprimeriilor Monitorului Oficial a făcut ca acest fond să nu poată fi folosit.

Tipărirea integrală a lucrării se face la Monitorul Oficial, Imprimeria Naţională, care şi-a procurat caracterele tipografice speciale precum şi hârtia standardizată utilizată la toate publicaţiunile recensământului.

PRÉFACE

Le présent volume, le deuxième de la série des publications du recensement général de 1930, contient la statistique de la population de Roumanie, répartie selon le groupe ethnique, la langue maternnelle et la confession, pour chaque localité du pays.

Ces éléments ont acquis une grande importance ces derniers temps, du fait qu'ils ont créé dans certains pays, un axe d'orientation politique.

Les titulaires au département du Travail, de la Santé et des Prévoyances Sociales, le professeur I. Răducanu d'abord, puis le professeur E. Hațieganu, le sous-secrétaire d'Etat le professeur Iuliu Moldovan, auquel nous devons l'initiative et l'organisation du premier recensement général de la population de la Grande-Roumanie, ainsi que la Commission du Recensement, présidée par le professeur Dimitrie Gusti, qui a imprimé aux travaux une orientation scientifique, ont été d'accord pour que le recensement de 1930 soit fait dans le sens d'une répartition aussi exacte que possible de la population par groupes ethniques.

Rappelons que lors du dénombrement de la population qui eut lieu en Avril 1927 grâce à l'initiative du ministre de l'Intérieur, Octavian Goga, aux travaux de M. T. Ionesco, alors directeur de la statistique démographique, et aux organes administratifs du Département de l'Intérieur, se pose pour la première fois le problème de l'« origine ethnique » de la population. Les résultats de ce dénombrement ont été soumis, conformément à la loi, à la ratification du Conseil Supérieur de la Statistique. Mais la ratification ne fut pas accordée, l'organe technique de l'Etat refusant de reconnaître la validité des chiffres.

A la suite de cette expérience, on s'est efforcé d'adopter d'autres critères permettant d'obtenir des données statistiques irréfutables.

A l'occasion du recensement de 1930 — qui constitue le premier recensement général de la population de la Grande Roumanie — il était indispensable que le Gouvernement soit à même de connaître la structure ethnique de la population, du fait surtout que, faute de données officielles roumaines, il fallait avoir recours aux résultats des recensements effectués avant-guerre, à savoir :

PREFACE

Volume II of the series of publications regarding the results of the general census of the population of 1930 comprises detailed statistics concerning race, mother tongue and religion of the population for each separate locality.

These elements have become very important in recent years, since several countries have adopted them to indicate a line of policy.

The government at the time of the census, represented by Prof. I. Răducanu, of the Department of Labour, Health and Social Welfare and later by Prof. E. Hațieganu and over by the Under-Secretary of State Prof. Iuliu Moldovan, who took the initiative in carrying out and organising the first general census of Greater Romania, together with the Census Commission presided over by Prof. Dimitrie Gusti, who has directed the work from the scientific point of wiev, were all agreed on the fact that the chief purpose of the 1930 census should be the precise verification of the ethnical distribution of the population of Romania.

It must also be kept in mind that, not long ago, in April 1927, on the initiative of the then Home Secretary Oct. Goga and by the unceasing work of Mr. N. T. Ionescu, then Director of Statistics, an enumeration of the population was made by the administrative organs of the Home Office, in which enumeration appeared for the first time the question regarding the ethnical origin of the people. This data was submitted, according to law, to the approval of the Higher Statistic Council, which did not grant the permission requested for publication. The results of this enumeration were therefore not accepted by the technical organs of State.

Taking this experience into consideration, other criteria have been searched for, by means of which incontestable statistical data could be obtained. The State must know the ethnical structure of the population, particularly as in default of official Romanian data the following prewar censuses only were available :

1. *Pour l'Ancien Royaume, le recensement de 1912 ;*

2. *Pour la Nouvelle Dobroudja, le recensement de 1910 ;*

3. *Pour la Transylvanie, le Banat, la Crişana et le Maramureş, le recensement de 1910 ;*

4. *Pour la Bucovine, le recensement de 1910 ;*

5. *Pour la Bessarabie, le recensement de 1897.*

Ces données ne pouvaient plus présenter aucun intérêt, non seulement parcequ'elles n'étaient plus actuelles, étant antérieures à la grande guerre qui a provoqué des transformations importantes dans la structure de la population, mais aussi du fait que les recensements d'avant-guerre étaient l'oeuvre de cinq pays à régime politique distinct et doués d'organisations statistiques totalement différentes, à savoir la Roumanie, la Bulgarie, la Hongrie, l'Autriche et la Russie. D'ailleurs le problème de la structure ethnique de la population de l'Ancien Royaume ne se posait même pas en 1912. Il s'est posé pour la première fois, abstraction faite du dénombrement de 1927, à l'occasion du recensement général de 1930.

Le recensement de 1930 s'est efforcé d'obtenir des renseignements aussi précis que possible. Il fallait cependant tenir compte du fait qu'il n'existe pas de critérium d'appréciation sûr dans le domaine de la statistique ethnique.

Mais en supposant même que ces critériums existent, la recherche de l'origine ethnique de tous les habitants du pays et les preuves à administrer à cet égard entraîneraient une procédure aussi longue que compliquée. Or il est impossible d'appliquer avec succès une telle procédure à un recensement général de la population qui doit être fait en un seul jour sur tout le territoire, afin d'éviter que des déplacements de population n'altèrent l'exactitude des chiffres.

Il fallait choisir entre le postulat d'une constatation objective, capable d'établir, sur la foi de documents, l'appartenance ethnique de chaque individu, et la déclaration subjective des intéressés (les mineurs bénéficiant de la déclaration de leurs parents), qui n'indique pas toujours l'origine ethnique, mais plutôt l'assimilation de l'individu par un certain groupe ethnique et mesure ainsi l'intensité du phénomène dans l'ensemble de la population.

La définition subjective présente le grand inconvénient des imprécisions anthropo-biologiques. Son emploi n'est justifié que dans les cas ou la science manque de critériums objectifs de la différenciation des races, ce qui est justement notre cas. Nous avons dû nous contenter de connaître le sentiment individuel des citoyens à l'égard de leur appartenance ethnique ; ce sentiment n'est guère immuable, mais il a l'avantage de faire connaître l'importance ses groupes ethniques selon que les citoyens se considèrent eux-mêmes comme appartenant à tel ou tel groupe.

1. *For the Old Kingdom the census of 1912.*

2. *For New Dobrogea the census of 1910.*

3. *For Transylvania, Banat, Crishana, and Maramuresh, the census of 1910.*

4. *For the Bucovina the census of 1910.*

5. *For Bessarabia the census of 1897.*

These statistics can no longer be used ; firstly because they are antiquated and previous to the war, which produced important changes in the structure of the population, secondly because these censuses were made by five different States, with different political systems and different statistical organisation. These states were : 1) *Romania,* 2) *Bulgaria,* 3) *Hungary,* 4) *Austria and* 5) *Russia. Moreover, for the Old Kingdom in 1912, the question of the ethnical structure of the population was never raised. This was first raised, apart from the attempt of 1927, on the occasion of the general census of the population in 1930.*

The object of the 1930 census was the obtaining of data as accurate as possible. We must however take into account the fact that, in the field of ethnical statistics, there are no certain criteria of appreciation.

Apart from this, even if such criteria existed, investigation and proof of ethnical origin of all the inhabitants of the country would entail a long and complicated procedure. It could not be applied with success at a general census, which, in order to avoid numerical inaccuracies due to the moving about of the people, must be carried out in one day throughout the country.

We must choose between the establishing of objective facts, which ascertain the ethnical origin of each individual on the basis of documents, and the subjective declaration of each citizen (or that of the parents for minors) which declaration does not always give us the ethnical origin, but indicates the assimilation of an individual to a given ethnical group, and shows the extent of this phenomenon throughout the population.

The subjective definition has the great disadvantage of anthropo-biological inaccuracy. Its use is only justified where science can offer no objective criterion of racial difference. We have been obliged to limit ourselves to ascertaining the individual sentiment of each citizen as to the ethnical group to which he belongs, a sentiment which is not always constant, but which nevertheless has the advantage of showing the extent of each ethnical group, in so far as each individual considers himself bound to one group or the other.

Ce principe une fois accepté, il s'agissait de trouver une définition simple et précise de l'appartenance ethnique subjective, et de prendre de sévères mesures pour que l'enregistrement se passe librement, en toute liberté de conscience. On a adopté donc la définition suivante : chaque citoyen sera tenu d'inscrire sur le bulletin le groupe ethnique auquel le lient la tradition et ses propres sentiments.

Toutes les assurances furent données que les déclarations seront acceptées à la lettre, sans que le recenseur puisse les modifier ou procéder à leur vérification. Cette mesure s'est imposée tout naturellement du moment que la Commission du Recensement a adopté la méthode subjective de constatation de l'appartenance ethnique. Dans les instructions émises à ce sujet, on a eu soin d'exiger que les déclarations soient plausibles, c'est-à-dire qu'elles ne fassent pas mention de groupements ethniques inexistants en Roumanie, ou de races de couleur.

Ce principe fut respecté sur tout le territoire roumain, à l'exception d'une seule et unique localité où, contrairement aux instructions reçues, le délégué de la Direction du Recensement, sur sa propre initiative et par excès de zèle, a déclaré comme invraisemblables certaines déclarations qui auraient dû être acceptées telles quelles. Il a été procédé en tout à la vérification d'une dizaine de déclarations provenant toutes d'une seule et même localité, ce qui ne pouvait guère exercer une influence sensible sur le résultat final, pas même dans la localité en question (il s'agissait de juifs de confession mosaïque qui avaient déclaré une appartenance magyare. En Transylvanie, ce phénomène a eu lieu sur une grande échelle, et nos publications enregistrent fidèlement toutes les données telles qu'elles résultent des déclarations faites).

Après avoir accepté le critérium subjectif, il a fallu renoncer à l'expression « origine ethnique » et adopter celle de « groupe ou appartenance ethnique ».

Ces principes une fois posés par la Commission du Recensemment et approuvés par le Gouvernement, il fallait prendre les dispositions nécessaires pour que l'enregistrement et le dépouillement des chiffres se fassent selon la technique statistique scientifique, afin que l'exactitude des déclarations soit garantie. Toutes mesures utiles furent prises à cet effet par la Direction du Recensement Général de la Population de 1930.

Il était de toute nécessité que la Commission du Recensement acquière la conviction que les citoyens roumains savent à quel groupe ethnique ils appartiennent. Un argument péremptoire fut invoqué à cet égard : il est évident, a-t-on dit, que la génération qui a fait la Grande Guerre — et qui a assisté à toutes les transformations politiques qui s'en suivirent — n'a pu se contenter d'un rôle passif sur le plan de la

Once this principle is accepted, we must find an accurate and simple definition of subjective ethnic origin, and must take the strictest measures to see that registration is made freely and in accordance with the conscience of each citizen. The definition adopted was this : people shall register under the race to which they feel bound by ties of tradition and sentiment.

It has been emphasized that this declaration is accepted, and that the enumerator has no right to modify it or to investigate its accuracy. This provision is only natural, as the Census Commission has decided to use the subjective method of ascertaining ethnical origin. Instructions were given, however, to the effect that all citizens must make plausible declarations, that is, they may not declare that they belong to races non-existent in Romania or to colored races.

We must state that this principle was respected throughout the country, with the exception of a single locality, where, the delegate of the Census Commission, acting on his own initiative and against instructions received, and out of excess of zeal, considered some declarations which should have been accepted without question, as improbable. These verifications, limited to some ten cases in a single locality out of the whole country, could in no way have influenced the results, even in that locality. (It was a question of Jews of Mosaic religion who declared themselves of Hungarian race. In Transylvania this phenomenon occured on an extensive scale, and in our publications the data appear in accordance with the declarations made).

The accepting of the subjective criterion for the determining of ethnical groups involved the abandoning of the definition « ethnical origin » and the adoption of the word « race » or « nativity ».

Once this was settled by the Census Commission and approved by the Government, proper measures had to be taken to ensure that the registering and working up of the data be done according to technical criteria of scientific statistics, in order to guarantee the accuracy of the declarations. These measures were taken by the General Census Directorate of 1930.

The Census Commission must at all costs be convinced of the fact that in Romania every citizen knows *to which ethnic group he belongs. One decisive argument was invoked ; it is a fact that the generation which took part in the World War — and witnessed all the political changes brought about by it — did*

conscience nationale. Chaque individu s'est forcément rallié à un camp, quel qu'il fût, et y a combattu avec ou sans conviction, mais pénétré du sentiment qu'il se trouvait bien à sa place et qu'il ne pouvait guère en occuper une autre.

La formation des légions des volontaires, la surveillance au front des soldats minoritaires par les anciennes monarchies, les groupements militaires formés pendant les révolutions de 1917 et 1918, tout indique que, du moins sur le plan de la conscience, tous les individus savent quel est le groupe ethnique qui leur inspire le plus de sympathies, et auquel leurs propres sentiments les lient par des liens de solidarité nationale.

C'est là l'argument qui fut invoqué par la Commission du Recensement lors de la discussion du problème de la statistique ethnique proprement dite.

Il nous faut souligner le fait qu'il n'existe dans aucun pays du monde des critériums objectifs pouvant permettre d'obtenir une statistique ethnique plus précise. Bien plus, aucun pays n'a eu recours à la méthode directe du dénombrement des citoyens par groupes ethniques. Presque tous les pays ont renoncé à cette méthode que nous aurions dû nous-mêmes abandonner pour nous conformer à l'usage international.

En effet, à l'époque du recensement général de 1930 était en vigueur une méthode indirecte, selon laquelle l'appartenance ethnique était en fonction de la langue maternelle [1]).

Il est vrai que les pays coloniaux ou ceux à populations de race noire font une distinction entre blancs et noirs, blancs et aborigènes ; la recherche du groupement ethnique n'y est appliquée qu'aux immigrants, ces derniers étant parfois confondus avec le pays d'origine.

Les critériums selon lesquels fut établie notre définition des groupes ethniques sont les plus complets de tous ceux qu'a connus jusqu'à présent la littérature internationale, à savoir: 1) *le groupement ethnique déclaré ;* 2) *la langue maternelle qui est enseignée par les parents et que l'on parle d'habitude ;* 3) *la confession — laquelle représente un état objectif légal et un critérium d'identification ethnique (d'une valeur absolue pour certaines nations*

[1]) *En Allemagne, en Pologne, en Hongrie, en Tchécoslovaquie, la structure ethnique de la population a été établie conformément au critérium de la langue maternelle (parfois celle que l'on parle d'habitude) ; en 1930, la Tchécoslovaquie a renoncé au critérium adopté lors du recensement de 1921, pour adopter celui de la langue maternelle.*

En U.R.S.S. par contre, on supprime la rubrique « langue maternelle » prévue au questionnaire de 1920 pour ne laisser subsister que la rubrique « nationalité ». En Estonie, chaque citoyen est libre d'établir lui-même sa nationalité.

A la XX-ème session de l'Institut International de Statistique, l'ordre du jour de la séance du 16 septembre 1931 prévoyait, sur la proposition du représentant de la Hongrie, le problème de la recherche de l'appartenance ethnique selon le critérium de la langue maternelle (celle que l'on parle le plus souvent et le plus volontiers). Après d'interminables discussions, soulevées par les difficultés d'ordre théorique et pratique inhérentes à l'application de critériums objectifs à la recherche de la nationalité ethnique, la discussion fut ajournée sans qu'il fût possible d'aboutir à une conclusion.

not remain passive from the point of view of national conscience. Each individual fought either in one camp or the other, with or without conviction, but conscious of the fact that his place was there, or on the opposite side. The formation of volunteer legions, the supervision on the front of all minority soldiers, the military groups formed in the revolutions of 1917 and 1918 — all this showed that, at least as regards conscience, each individual realised with what ethnical group he sympathised and with what group he felt at one from the national and sentimental point of view.

This was the principal argument of the Census Commission, when the question of ethnical statistics proper was discussed.

We must however point out that in no country of the world is there an objective criterion of judgement which permits the drawing up of absolutely accurate ethnical statistics. And not only that. No country has employed a direct method of counting the population according to ethnical groups. Almost all the countries of the world have abandoned this method, which, according to international usage, we should have abandoned. At the time of the census of 1930, an indirect method was used almost everywhere, ethnical origin being identified with the mother tongue [1]). *It is also true that colonial countries or those having a negro population, made a difference between white and colored, white and aborigines, only immigrants being asked about their race, and this sometimes being confused with the latter's country of origin.*

Our criterion of definition of ethnical groups is the most complete of those known in international statistices on the subject. These criteria are :

1) *Race declared ;* 2) *Mother tongue learned from parents and spoken from choice ;* 3) *Religion —*

[1]) *Thus the ethnical structure of the population was established according to the mother tongue (sometimes simply the language usually spoken) in Germany, Poland, Hungary, Czecho-slovakia ; the latter abandoned the « ethnical nationality » used in the 1921 census, adopting the mother tongue in 1930.*

A contrary phenomenon occured in U.R.S.S., which deleted the question « mother tongue » existing in 1920, and only kept that regarding nationality ; while in Estonia each citizen is free to choose his own nationality.

We must also mention that at the 20 th congress of the International Institute of Statistics, at the session of September 16 th 1931, on the proposal of the Hungarian representative, there was put on the agenda the problem of establishing ethnical origin on the basis of the mother tongue (the languages spoken oftenest and for choice). After protracted discussion, where the theoretic and practical difficulties raised by the establishment of an objective criterion for the ascertaining of ethnical nationality were emphasized, the discussion was postponed without any decision being arrived at.

tions et relative pour d'autres, mais toujours précieuse lorsque la confession se trouve associée aux autres éléments d'information) aussi important que celui de la langue — et enfin 4) la qualité de citoyen.

Dans la première partie du tome II, nous publions les données concernant le groupe ethnique et la langue maternelle, réparties dans un même tableau, par localités, de manière à permettre une comparaison aisée. Nous nous sommes efforcés d'obtenir un enregistrement aussi complet et sincère que possible, en groupant ensuite les résultats de manière à être comparés et contrôlés sans peine.

Nous estimons que cette présentation obéit à un procédé éminemment scientifique et patriotique. De cette manière, risquerait-on de commettre un nonsens en essayant de contester un chiffre total. Il faudrait démontrer l'inexactitude des chiffres partiels. Les archives documentaires de l'Institut Central de Statistique renferment les bulletins d'enregistrement par familles, comprenant tous éléments et pièces nécessaires, établis par rues, maisons et ménages fixes, et non par individus ou familles volantes ; de cette manière, l'Institut est toujours à même d'administrer une preuve de fait coupant court à toute controverse.

Les chiffres se rapportant aux rubriques «groupe ethnique» et «langue maternelle» sont imprimés sur deux pages se faisant face, car ces éléments sont facilement comparables. Des motifs d'ordre typographique ne nous ont pas permis d'y placer aussi les rubriques confession et qualité de citoyen. Cette dernière répartie par unités administratives plus larges doit paraître prochainement dans le IV-e volume des publications du recesement de 1930. Nous estimons toutefois que le procédé adopté donnera pleine et entière satisfaction et permettra aux critiques, ainsi qu'à toute personne intéressée, d'approfondir le problème ethnique en Roumanie.

De ce qui précède, il résulte donc que le nombre des groupes ethniques dont l'existence fut reconnue en Roumanie n'a pas été limité par les organes qui ont procédé au recensement. Toutes les déclarations ont été acceptées telles qu'elles ont été faites. Il n'existe donc pas une liste des nationalités admises à l'enregistrement. La Direction du Recensement général de la population de 1930 n'a contraint personne à se déclarer en faveur d'un certain groupe ethnique. Elle s'est même forcée de veiller à ce qu'aucune propagande ne fasse pression, dans quelque sens que ce soit, sur les déclarations.

Mais lorsque les matériaux ont dû être triés et classés, la technique des travaux a exigé qu'une liste des nationalités fût dressée selon leur rapport de fréquence. Il en fut de même des rubriques langue maternelle et confession.

Les listes dressées en vue du dépouillement statistique des trois rubriques — groupe ethnique, which in Romania constitutes a legal state which is just as important in ethnical identification (absolutely for some races, relatively for others, and always valuable when taken together with other elements of information) as the mother tongue ; 4) Citizenship.

In volume II, part I, data are published for each locality regarding race and mother tongue, in similar lists, so that they can easily be compared. We have done all in our power to ensure that the registration be complete and accurate, and have then published the results, so that they may be checked and compared.

We think that the presentation of this work is a proceeding not only eminently scientific, but also patriotic. In view of this, it would be nonsense to contest the total figures. The inaccuracy of separate figures would have to be examined. In this case however, the Central Institute of Statistics has in its files the registered family sheets with all necessary details and certificates, drawn up according to streets, buildings and stable households and not wandering persons or families, so that proof of the facts can be made at any time, thus excluding any possibility of controversy.

We have put face to face, on two pages, the data referring to race and mother tongue, since these are the easiest to compare. The technique of printing has not allowed us the publishing of religion and citizenship on the same page. The latter have been published for larger administrative units. However, we think that this procedure will give full satisfaction and will permit to critics and investigators a serious study of the ethnical problem of Romania.

As shown above, the number of races recognized in Romania was not limited by the census organs. All registrations were accepted as they were made by the citizens. Thus there is no list of races admitted to registration. The general Census Directorate of 1930 forced no one to declare that he belonged to one race or another. The Census Directorate was even obliged to see that declarations were not influenced by propaganda of any kind.

In the working of the list however, technique has imposed the drawing up of a list of the races which were most frequently declared. The same thing was done for the mother tongue and for religion.

The lists established for the working of the statistics of the three problems, that is, race, mother

langue maternelle et confession — publiées dans le présent volume, sont établies comme suit :

En ce qui concerne les confessions, la Commission du Recensement s'est conformée à la loi des cultes.

Lors de la publication des résultats il a fallu tenir compte des exigences typographiques. Ce qui fait que nos listes ont dû comprendre les éléments suivants :

Groupes ethniques : roumains, hongrois, allemands, russes, ruthènes-ukraïniens, serbes-croates-slovènes, bulgares, tchèques-slovaques, polonais, houtzoules, juifs, grecs, albanais, arméniens, turcs, tartares, « gagaouzi », tziganes, autres groupes ethniques, non déclarés.

Langue maternelle : roumaine, hongroise, allemande, russe, ruthène-ukraïnienne, serbe-croate-slovène, bulgare, tchèque-slovaque, polonaise, yiddish, grecque, albanaise, arménienne, turque-tartare, tzigane, autres langues, non déclarée.

Confession : orthodoxes, gréco-catholiques, catholiques, réformés (calvinistes), évangéliques (luthériens), unitaires, arméno-grégoriens, arméno-catholiques, lipovans, adventistes, baptistes, mosaïques, mahométans, autres confessions et sectes, sans confession et libre-penseurs, confession non déclarée.

Comme nous l'avons deja indiqué, le groupe ethnique a été accepté tel qu'il a été déclaré par les habitants. Mais s'il avait existé des déclarations massives de groupes ethniques apparentés et cependant distincts, nous aurions établi une nouvelle division même au risque de provoquer des complications d'ordre technique qui auraient retardé les travaux[2]). *On a pu cependant constater que les*

As far as religions are concerned, the Census Commission kept to the law of religions.

At the publication of these results we had to take typographical necessities into account. The result of this is that our lists comprise the following elements :

Race: *Romanians, Hungarians, Germans, Russians, Ruthene-Ukrainians, Serbian-Croat-Slovens, Bulgarians, Czecho-Slovakians, Poles, Hutzans, Jewish, Greeks, Albanians, Armenians, Turks and Tartars, Gagautzes, Gipsies, Other Races, Undeclared.*

Mother Tongue: *Romanian, Hungarian, German, Russian, Ruthenian-Ukrainian, Serbian-Croat-Slovene, Bulgarian, Czechoslovakian, Polish, Yiddish, Greek, Albanian, Armenian, Turkish-Tartar, Gipsy, Other Languages, Undeclared.*

Religion: *Orthodox, Greek Catholic, Roman Catholic, Reformed (Calvinist), Lutherian-Evangelical, Unitarian, Armenian-Gregorian, Armenian-Catholic, Lipovanian, Adventist, Baptist, Mosaic, Mohamedan, Other Religions and Sects, Without Religion, Free Thinkers, Undeclared Religion.*

As we have shown, the race was accepted as it was declared by the citizen. If however there had been mass declarations of races related but not identical, we should have made a new division of these races, even if this had produced complications of a technical nature, which would have delayed the termination of the work[2]). *It was proved however*

[1]) *All other religions wich do not figure in this list, but which were declared at the census.*

[2]) *The results of the General Census of 1930 appear with considerable delay, owing solely to lack of funds. The fact must be kept in mind that the whole work was carried out by a small staff detached*

Roumains ont déclaré appartenir au groupe ethnique roumain sans distinction des désignations régionales (moldaves, « motzi », « mocani », etc.). Les allemands ont déclaré appartenir au groupe ethnique allemand, bien que dans l'histoire et dans la conscience publique ils soient connus sous le nom de saxons, souabes, etc., et qu'ils parlent le dialecte saxon, souabe, etc. De même, les hongrois de toutes les provinces ont déclaré appartenir au groupe ethnique hongrois, bien qu'ils portent le nom de magyars, «secui», «ciangăi» (ces derniers groupes ne parlant pas un dialecte spécial). Enfin, les ruthènes-ukraïniens et les russes ont été enregistrés séparément, conformément à leurs déclarations.

La Direction du Recensement général de la Population de 1930 ne pouvait qu'appliquer strictement les principes adoptés par la Commission du Recensement, en évitant de soulever des controverses d'ordre technique qui auraient dépassé ses attributions légales. Elle a d'ailleurs rigoureusement respecté ce principe.

Nous n'analyserons pas les données comprises dans le présent volume, les volumes individuels ne devant comprendre que les données analytiques, les tableaux synoptiques et un bref exposé de la technique des travaux. Les analyses feront l'objet d'un volume spécial qui va clore cette série de publications et qui traitera aussi des données comparatives.

Nous nous contentons donc de publier les cartogrammes ethnographiques et linguistiques, ainsi que les cartogrammes de la répartition de la population selon la confession, de même que les tableaux généraux récapitulatifs.

Nous indiquons aux tableaux ci-après la répartition de la population selon le groupement ethnique, la langue maternelle et la confession.

restreint de fonctionnaires délégués à cet effet par les autorités qui les occupaient, et par un certain nombre d'employés auxiliaires.

Un personnel par conséquent manquant presque totalement de l'expérience au commencement des travaux.

Pour le dépouillement des chiffres on a adopté en outre la méthode mécanique introduite pour la première fois en Roumanie.

Malgré ces difficultés, l'Institut aurait pu déjà commencer ses publications en 1934 s'il avait disposé des fonds nécessaires. Le premier fonds ne fut inscrit au budget qu'en 1937/1938, mais n'a guère pu être utilisé à ce moment, car les imprimeries du Moniteur Officiel étaient surchargées de besogne.

Le présent ouvrage est imprimé par le Moniteur Officiel (Gazette Officielle) — Imprimerie Nationale — qui a acquis à cet effet les caractères typographiques et le papier standard utilisés pour toutes les publications du recensement.

that Romanians declared themselves as such even when calling themselves Moldovians, Motzi, Mocans, etc. Germans declared themselves as such even when in public conscience and history they appear as Saxons, Swabians, etc., or speak German, Saxon, Swabian, etc. Hungarians declared themselves as such in all provinces, even when they are known as Magyars, Sacuis, or Changais (there is no Sacui or Changai language known). Finally, according to their declarations, Ruten-Ukranians and Russians were registered separately. Their own declarations made a distinction between Russian and Ruthen-Ukrainian.

The Directorate of the General Census of Population of 1930 could only apply the principles laid down by the Census Commission, and could enter into no controversy of an ethnical nature, the resolving of which would have exceeded their legal duties. This principle has been most faithfully adhered to.

We shall not analyze the data in this volume. It has been decided that the individual volumes shall only comprise general data, lists of a general nature and a short summary of the technical side of the work. Analyses of the data shall be made in a special volume, which shall conclude the series of publications and shall also contain comparative data.

We confine ourselves to publishing ethnological and linguistic diagrams; and those regarding the distribution of the population according to religions, together with recapitulation tables.

In the following lists we shall show the general distribution of the population of Romania according to race, mother tongue and religion.

from other authorities, with the help of a slightly larger number of non-budgetary workers. Thus, staff with previous experience was almost entirely lacking at the begining of the work.

To this difficulty must be added the fact that preliminary work was done mechanically, for the first time in Romania.

In spite of these difficulties, the Institute would have been able to publish the work in 1934, if there had been funds for publication. The first fund to this end was entered in the budget in 1937/1938. Unfortunately, previous engagements and overworking of the Governement Printing Office rendered it impossible to use this fund.

The printing of the whole work was done by the Governement Printing Office which procured special typographic characters and the standardised paper used for all Census publications.
